

REMOVING A FAILED DC FROM DNS

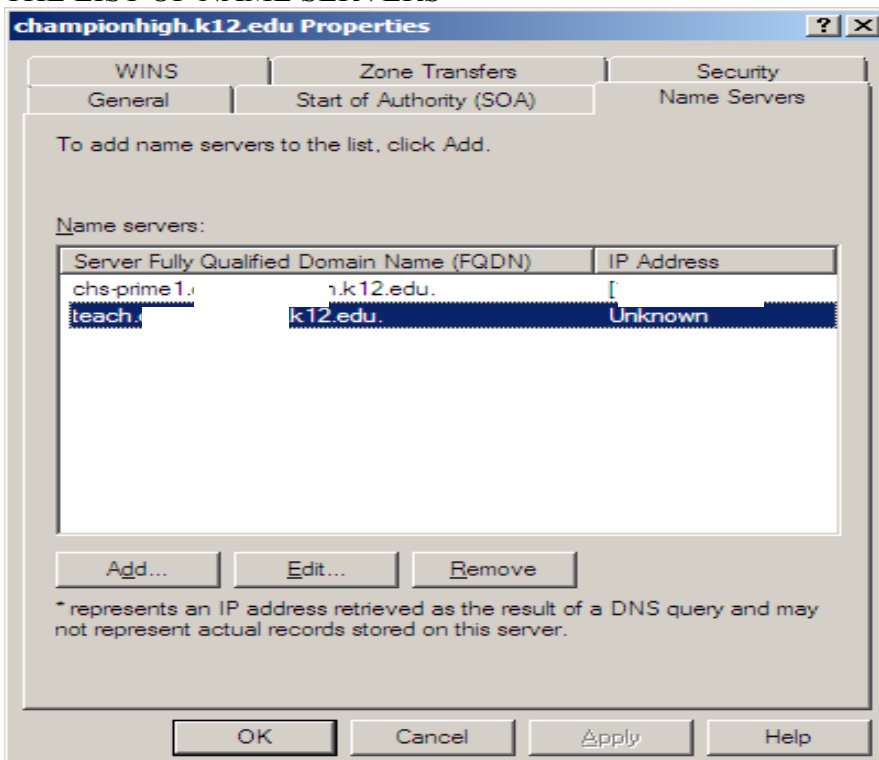

~ WINDOWS SERVER 2008 ~

OPEN "DNS"

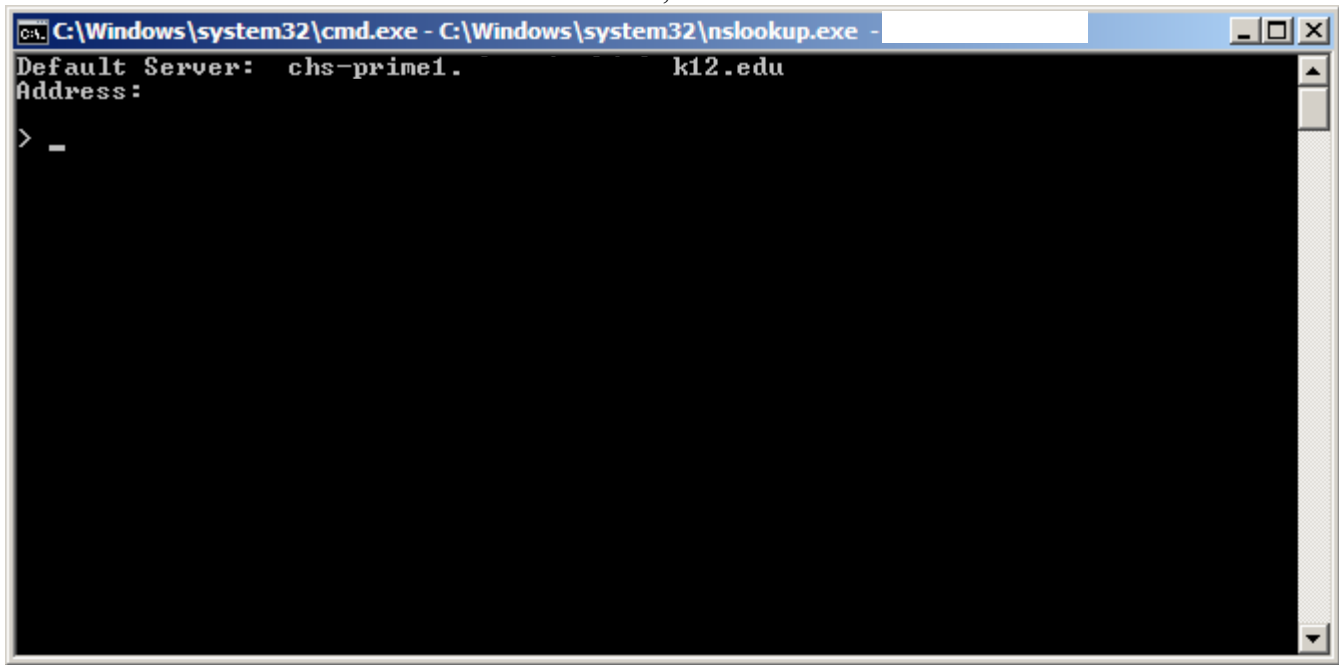

BROWSE THROUGH ALL FOLDERS AND **DELETE** ANY RECORDS REGARDING THE FAILED DC

UNDER THE DOMAIN NAME, **SELECT** THE NS RECORD AND **REMOVE** THE FAILED DC FROM THE LIST OF NAME SERVERS

AFTER DELETING ANY EXISTING RECORDS, **CHECK NSLOOKUP**

```
C:\Windows\system32\cmd.exe - C:\Windows\system32\nslookup.exe -
Default Server: chs-prime1.k12.edu
Address:
> _
```

NOTE: DUE TO THE SECURITY OF THE NETWORK USED IN THIS EXAMPLE, THE SPECIFICS OF THE DC CONFIGURATION OF BEEN HIDDEN. THE MISSING DATA WILL BE REPLACED WITH THE SPECIFICS OF YOUR DC CONFIGURATION. IF YOU HAVE ANY QUESTIONS OR CONCERNS, PLEASE CALL HUCOR TECHNOLOGIES AT 330-219-8301.
